FULL LEG WRAP, LYMPHEDEMA, 4-CHAMBER, LARGE, STANDARD, WITH EXTENDER

Re-Order Part Number: 0P9BLYM003-E – Non-Sterile

**Step 1:** Open up lymphedema wrap and zip one zipper edge of the extender to the wrap.

**Step 2:** Zip the remaining zipper edge of the extender to the lymphedema wrap.

**Step 3:** Slide leg into wrap as shown.

**Step 4:** Line up and install connector end into the unit. Squeeze the sides of the connector while pushing into the ports of the unit until flush and connector locks into place (Step 5).

**Step 5**
**Precautions:**

- Carefully read user instructions and warnings prior to operation.
- Therapy wraps are non-sterile and should not be directly applied to an open wound. Do not use directly over breached skin. This product should not be used during the inflammatory phlebitis process or during episodes of pulmonary embolism, congestive heart failure, pulmonary edema, suspected deep vein thrombosis, acute inflammations of the veins (thrombophlebitis), decompensated cardiac insufficiency, arterial dysregulation, erysipelas, deep acute venal thrombosis (phlebothrombosis), carcinoma and carcinoma metastasis in the affected extremity, decompensated hypertonia, acute inflammatory skin diseases, infection, venous or arterial occlusive disease or in any instances where increased venous and lymphatic return is undesirable. Use with caution on an extremity which is not sensitive to pain. Individuals with extremely low blood pressure should check with their doctor before using ThermoTek products.
- These products are to be fitted initially by a healthcare professional that is familiar with the purpose for which they are used. The healthcare professional is responsible for providing wearing instructions and precautions to other healthcare professionals, care providers involved in the patient’s care, and the patient. If unusual swelling, skin discoloration or discomfort occurs, use should be discontinued and a healthcare professional consulted.
- A therapy wrap with therapy unit should be used in a medical facility or clinical environment with direct healthcare provider supervision. If the prescribing healthcare practitioner determines it is appropriate for a patient to use the therapy wrap at home, the healthcare practitioner must provide the patient with adequate and appropriate instructions for use of the device. Further, the healthcare practitioner must monitor the patient’s use of the device to assure appropriate use of the device and appropriate application of therapy.
- Do not attempt to sterilize a non-sterilized wrap or re-sterilize a sterilized wrap by any means.
- Do not use wraps near open flame.
- Do not smoke while therapy wraps are in use.
- Disposable therapy wraps are designed for single patient use only and may only be used on the same patient for the length of the treatment.
- Do not wrap the therapy wrap so tightly as to restrict blood or fluid flow. Do not use pins to secure the therapy wrap or hoses.
- Do not allow the therapy wrap or hoses to contact sharp objects.
- Dressings used under the therapy wrap should be applied lightly.
- Wraps should not be left open (off of the patient) and inflated to a “balloon” or “ball” state for extended periods of time.
